

iOS Software Engineer [Part-time Role]

Canaria is developing cutting-edge technology to make everyone on and off Earth that little bit healthier. Canaria leverages the latest IoT technology to provide real time, continuous healthcare monitoring and safety-critical alert systems to some of the harshest environments in the universe. Our solutions have won recognition from NASA and have been previously featured at events such as CES 2017.

What you'll do:

- Contribute exceptional programming skills to a fast-paced development program
- Test developed code for usability, reliability and elegance
- Collaborate and communicate with the rest of Canaria to ensure our users receive the best possible user experience

Skills we're excited about:

- Demonstrable experience developing applications for iPhone and iPad
- Expertise in Swift and developing native iOS apps
- Strong knowledge of Bluetooth protocols, memory management, and threading

Perks:

- Opportunity to have software that you've made be used in some of the harshest environments that exist—including space!
- Competitive salary
- Full access to employee bonus and equity schemes
- Flexible working hours
